SUMMARY

UI/UX Designer and Visual Brand Specialist with hands-on experience delivering end-to-end design solutions, from user research and wireframing to high-fidelity prototyping and brand identity. Currently a 5th-semester Software Engineering student at SMKN 1 Dlanggu, with a proven track record of serving 500+ clients across branding, social media, and product design projects. Proficient in Figma, Adobe Illustrator, and Photoshop. Committed to creating interfaces that are not only visually compelling but genuinely user-centered.

EXPERIENCE

GRAPHIC DESIGNER

(Desember 2024 - Now)

- *Creating a branding design kit*
- *Created branding kits and social media design assets for multiple agencies*
- *Designed end-to-end UI/UX for a money management app and a cash book app, covering user flows, wireframes, and high-fidelity prototypes in Figma*
- *Managing and delivering design projects for 500+ clients worldwide*

FORMAL EDUCATION

SMKN 1 DLANGGU SOFTWARE ENGINEERING (2024-NOW)

- Focusing on Full-Stack Web Development, mastering core technologies such as PHP, MySQL, Laravel, and React.
- Developing a strong foundation in programming logic, database management, and system architecture.
- Building responsive and functional web applications with a focus on clean code and efficient backend-frontend integration.

NON-FORMAL EDUCATION

SEKOLAHDESIGN.ID (2024-2025)

- Learned the core principles of animation to transform static visual assets into dynamic motion content.
- Gained technical skills in keyframing and composition to enhance digital branding and social media engagement.

LAB AKSELARASI (2023-2024)

- Studied User-Centered Design (UCD) methodologies, covering the end-to-end process from user research to wireframing.
- Mastered high-fidelity prototyping and interface design using Figma, ensuring accessibility and aesthetic appeal.
- Developed expertise in Graphic Design fundamentals, including typography, color theory, and visual composition for brand identity projects.
